

VESA® Announces Two DisplayPort Workshops and a PlugTest in Asia

Milpitas, Calif., September 17, 2009 → The Video Electronics Standards Association (VESA), the global display standards setting organization, today announced two DisplayPort Workshops and a DisplayPort PlugTest in Asia for the fourth quarter of 2009.

The DisplayPort Workshops will be held on October 26, 2009 at the Hyatt Regency in Tokyo, Japan and October 28, 2009 at the Grand Formosa Regent in Taipei, Taiwan. The Workshops will focus on a review of key VESA standards with emphasis on product benefits; PC industry transition away from DVI, LVDS, and eventually VGA; a review of DisplayPort features, capabilities, and logo programs; and presentations from key PC ecosystem sectors. There will be several demonstrations featuring the benefits of DisplayPort and related VESA standards. For more information send a request to dpworkshop@vesa.org.

VESA will also be hosting a DisplayPort PlugTest from December 7 to December 10 at the Pacifico Yokohama in Yokohama, Japan. The DisplayPort PlugTests are held regularly to promote DisplayPort product development, validate product compliance with the DisplayPort specification, help foster communication between DisplayPort product manufacturers and ensure that DisplayPort products operate together.

VESA PlugTests are limited to members of VESA. If a company is interested in becoming a member or would like more information on the PlugTest they should contact membership@vesa.org.
